

**cassette\_label\_12-up.pdf** rev.130508

Art is cut as shown by **red dieline**. Because there is no space between the labels, if you use a background other than white, the background should be the same on both the top and bottom to allow for fluctuations in the alignment of the art.

Art should extend to the **1p green line** for bleed.

When you submit your artwork, **dieline, bleed lines, safe zone lines** and instruction layer should be removed, leaving only the black cropmarks for positioning.

Do not repeat your artwork on the template. Just create one copy of your artwork using the top left position.

Do not knock out the centre of the design - leave it filled in.
